# Optic Fibre Cable - Single Mode

Networking Cables

### Features:

- > Optic Fibre Cables have a core that carries light to transmit data.  
This allows optic cables to carry signals at speeds that are only about 31 percent slower than the speed of light—faster than Cat5 or Cat6 copper cables.  
There is also less signal degradation with fiber cables.
- > Non Armoured
- > Single Mode
- > Fit for House indoor wiring - Internet Broadband Connection
